

# Industrial Dampers

## Industrial Dampers

are built to last in harsh environments and perform over a wide range of design conditions. At Nailor Industries, we are offering a variety of high quality products to fit your special needs. Industrial Dampers can be manufactured with rectangular, round, or oval frames of heavy gauge steel or stainless steel. Damper models offered as a standard are for isolation, volume control, backdraft and pressure relief of industrial ventilation ducts and process equipment.

Nailor can provide factory mounted and tested electric, pneumatic, or manual actuators to precisely control flow. Nailor can also provide the design experience to modify dampers for custom applications like extreme high or low temperatures, corrosive environments, or special control requirements. When you are specifying or selecting air control products, Nailor Industries can provide the right Industrial Damper to fit your application and meet your delivery schedule.
