

High Performance Horizontal Fan Coil Units 35FH Series

*-The Next
Generation*

**Engineered
Comfort**
www.engineered-comfort.com

Nailor Industries is proud to introduce the new standard for commercial high performance horizontal fan coil units. Ideally suited and designed for use in commercial building with Dedicated Outdoor Air Systems (DOAS). When equipped with EPIC Fan Technology[®], these units provide pressure independent operation, reduced energy consumption and improved occupant comfort.

- ▶ New compact space saving design
- ▶ Variable Air Volume control strategies with EPIC Fan Technology[®] provide optimum comfort
- ▶ Premium Draw-through Coil design for optimum heat transfer efficiency
- ▶ Direct drive ECM motors provide substantial energy savings
- ▶ Insulated coil casing increases thermal efficiency
- ▶ Wide airflow range, 400 - 4000 CFM
- ▶ High Capacity - up to 6 Rows Cooling and 2 Rows Heating
- ▶ High external static pressure capability up to 1" w.g.
- ▶ High efficiency MERV 8 and MERV 13 filters available
- ▶ 2-pipe, 4-pipe and Electric Heat options
- ▶ Ducted Outside Air Inlet options
