

3 WAYS TO FIT THE BUILDING

Excellent solution for new construction, retrofit and staged installation projects.

One Water Source Heat Pump Family

Designed specifically for high-rise, condominium, apartment, hotel, and dormitory applications, this comprehensive Water Source Heat Pump family delivers reliable performance, installation efficiency, and long-term energy savings.

- **AHRI certified performance** with low GWP **A2L Refrigerant** (EER up to ~17; COP >5)
- **ECM motors standard** for superior energy efficiency and quiet operation
- **Simplified installation** with factory-provided floor-to-floor risers for faster project completion
- **No Refrigerant Detection System required** for units up to 5 tons (RDS optional)
- Retrofit-friendly vertical stack model with separate cabinet and chassis designed to **fit most existing Water Source Heat Pump footprints**

Lead with Engineered Comfort's high-efficiency water source heat pumps, backed by a full lineup of fan coil units, retrofit models, and advanced accessories - engineered to elevate comfort in any building.
