

OUT OF WALL COMBINATION FIRE/SMOKE DAMPER

MODULATING

GRILLE MOUNT WITH ACTUATOR ACCESS 1 1/2 HR. LABEL • ULTRA-LOW LEAKAGE

MODEL: 1221-OWM

1221-OWM

QUALIFICATIONS:

- UL 555 & CAN/ULC-S112 CLASSIFIED DYNAMIC FIRE DAMPER 1 hr. Label (File # R9492).
- UL 555S & CAN/ULC-S112.1 CLASSIFIED SMOKE DAMPER Leakage Class I at 250°F elevated temperature (File # R9492).
- Meets NFPA 80, 90A, 92, 101 and 105 as well as IBC and NBC (Canada) **Building Code requirements.**
- Maximum velocity: 2000 fpm @ 4" w.g. (10 m/s @ 1 kPa).
- · For use in vertical or horizontal concrete partitions and vertical steel stud partitions only.

Model 1221-OWM is a modulating "out of wall" high performance combination fire/ smoke damper. It is specifically designed for supply or return ducts that terminate at a grille and provides through the grille access to the damper, actuator and other components. Standard sleeve length accommodates most commercial supply and return grilles/registers.

The 1221-OWM is ideal for applications where building codes require both a fire damper for the protection of ductwork penetrations in walls or floors that have a fire resistance rating of up to 2 hours and also require a leakage rated damper for operational smoke control in static or dynamic smoke management systems.

The 1221-OWM offers premium performance with the lowest leakage class available and a low pressure drop well suited to the majority of commercial applications. Unique, inter-locking double skin blade design eliminates combustible seals and provides flame and smoke seal under fire conditions at temperatures up to 2000°F (1093°C).

STANDARD CONSTRUCTION:

Frame: 5" x 7/8" x 16 ga. (127 x 22 x 1.6) galvanized steel hat channel.

14 ga. (2.0) equivalent galvanized steel formed airfoil on 5 1/2" Blades:

(140) centers. Opposed action.

16" x 20 ga. (406 x 1.0) galvanized steel with 3/4" (19) flange on Sleeve: one end standard for all dampers over 16" (406) high. Dampers

16" (406) high and under have a 20" (508) long sleeve.

Insulation: Intumescent thermal insulation on four sides. Linkage: Concealed in frame. 12 ga. (2.7) plated steel. Bearings: 1/2" (13) dia. self-lubricating oilite bronze. Axles: 1/2" (13) dia. plated steel double bolted to blades.

Jackshaft: 1/2" (13) dia. cadmium plated steel.

Jamb Seals: Stainless steel.

Heat Responsive Device (Controlled Closure):

ERL (Electric Resettable Link) is standard on dampers with electric actuators: 250°F (121°C) standard. 165°F (74°C) and 212°F (100°C) available.

Sizes (Duct W x H):

BASE MODEL SELECTION:

☐ 1221-OWM Standard 16" (406) long x 20 ga. (1.0) insulated sleeve with 3/4" (19) flange on grille side.

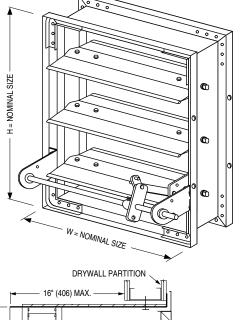

☐ 1221-OWM Non-standard sleeve. Specify lenath.

> Shorter sleeve lengths are available (down to 14" [350]) dependant on height. Contact factory for limitations.

Dimensions are in inches (mm).
