

PLENUM SLOT DIFFUSER SUPPLY • ADJUSTABLE "FLIP-FLOP" PATTERN CONTROLLERS MODEL: 5675 AND 5610

DESCRIPTION:

1. The 5600 Series Plenum Slot Ceiling Diffusers have been designed for standard lay-in T-Bar ceiling grid applications. They integrate and blend with the suspended grid, so offering an extremely unobtrusive method of air distribution. Designed with the popular 3/4" (19) and 1" (25) slot spacing, the 5600 Series design offers high performance and extremely good value, where budgetary restraints are a consideration.
2. The 5600 Series features a roll-formed curved blade pattern controller in each slot. Aerodynamically designed to produce a fixed horizontal discharge pattern, the controller is pivoted at either end and may be simply rotated with fingers from the diffuser face for either a left or right discharge direction. In either horizontal discharge setting, the coanda effect is maximized and a tight blanket of air is projected across the ceiling. The horizontal pattern is maintained throughout a wide range of cataloged air volumes from maximum to minimum flow. Factory furnished center tees are dropped below diffuser face to match the ceiling grid. They are an excellent choice for VAV applications.

Standard nominal lengths: 20", 24", 30", 36", 48" and 60" to suit imperial ceiling grids. 500, 600, 750, 900, 1200 and 1500 mm to suit metric grids.

Number of slots: Choice of 1, 2, 3 or 4 slot configurations.

Standard inlet sizes: 6", 8", 10" and 12" (152, 203, 254 and 305). Other sizes are available.

3. Material: Corrosion resistant steel for plenum, pattern controllers and center tees.
4. Standard Finish:
BK Black pattern controllers and exposed surfaces.
AW Appliance White on center T-bars.

☐ PF Slot Diffuser Plaster Frame

The PF Plaster Frame, for plenum slot diffusers enables the installation of Lay-in T-Bar style diffusers to be installed in drywall or plaster ceilings. Installation of the frame in the ceiling is by others.

(Note: Diffuser will not fit through a plaster frame opening).

Material: Extruded aluminum with mitered corners.

Recommended Ceiling Opening dimensions:

Width = Diffuser Width (D) + 1/2" (13)

Length = Nominal Diffuser Length + 1/4" (6)

☐ T-Bar Mounting Clips

The factory installed mounting clips assist to reinforce and stabilize the plenum during and after installation.

☐ M1 One Side

(2 supplied opposite inlet side)

☐ M2 Both sides

(4 total supplied)

☐ CN Cross Notch

The CN Cross Notch option allows a 48" (1200) plenum unit to be installed in a 24" x 24" (600 x 600) ceiling grid. Available on both supply and return models.

☐ ID Inlet Damper

(Supply models only)

This single blade damper is an economical factory installed option that permits air balancing of the device at the plenum inlet. Ceiling access is required.

☐ EX External Foil Back Insulation

1/2" (13) thick fiberglass blanket with a reinforced aluminum foil scrim-kraft (FSK) facing that provides a vapor barrier. The insulation is wrapped around the outside of the plenum. It is an option on all non-insulated models.

☐ ST Straddle T-Bar

The ST Straddle T-Bar option is a center channel that allows the plenum to straddle the T-Bar.

It is an option on both 2 or 4 slot units. (The T-Bar is supplied by others.)

Supplementary T-Bars

☐ T1 One on inlet side

☐ T0 One opposite inlet side

☐ T2 Two on both sides

As standard, multiple slot plenums include factory installed center T-Bars.

However, if required, supplementary T-Bars can be ordered as an optional accessory for either one side or both sides of the plenum.

Performance Notes:

- Throws are given at 150, 100 and 50 fpm terminal velocities under isothermal conditions.
- All Pressures are in inches w.g..
- Cataloged throws are for a one-way horizontal air pattern. For divided airflow, deduce the airflow in each direction according to the number of slots, with the total airflow apportioned between the slots. Look up throw for the airflow in each direction according to the number of slots in that direction.
- Noise Criteria [NC] values based on a room absorption of 10 dB, re 10⁻¹² watts. Dash (–) in space denotes a Noise Criteria level less than 15.
- Data derived from tests conducted in accordance with ANSI/ASHRAE Standard 70 – 2006.
