ITEMS:

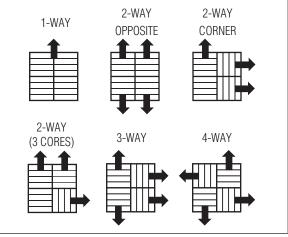

- 1. Flexible air duct (UL Class 0 or 1) connector or steel duct.
- 2. U.L. Listed fusible link. 212°F (100°C) standard.
- 3. Ceiling radiation damper (Model 0722).
- 4. Ceramic fibre thermal blanket accessory (Model 0725).
- 5. Corrosion resistant steel diffuser.

DESCRIPTION:

- All models are classified for use in UL/ULC restrained or unrestrained floor/ceiling and or roof/ceiling assemblies which incorporate an exposed grid suspended ceiling (lay-in T-bar) with up to a 3 hour rating. For details of fire rated assemblies, see the current UL or ULC Fire Resistance Directory.
- The diffuser consists of four spring loaded modular cores that may be simply adjusted by rotating each module after installation to provide a 1, 2, 3 or 4-way blow pattern. A tight horizontal air pattern from maximum to minimum flow makes it ideal for VAV applications.

MODULAR CORE ADJUSTMENTS

(The Model 7500FRD is shipped with the core set for 4-way discharge).

- The fixed radiation damper is standard. The AV adjustable option is not available on this model as the core restricts access. Balancing should be performed by installing a remote damper in the duct take-off.
- 4. Standard finish is AW Appliance White.
