

	REG. EQUIP.
Technical Data	
Power Supply	24 VAC, ±20%, 50/60 Hz, 24 VDC, -10% /
	+20%
Power consumption in operation	6 W, 9.5 VA
Power consumption in rest	3 W, 5 VA
position Transformer sizing	10 VA (class 2 power course 24 VAC only)
Transformer sizing Shaft Diameter	10 VA (class 2 power source 24 VAC only) 1/2" to 1.05" round, centers on 1/2" and
Shart Diameter	3/4" with insert, 1.05" without insert
Electrical Connection	3 ft [1 m], 18 GA appliance cable with 1/2"
	conduit connector
Overload Protection	electronic throughout 0° to 95° rotation
Electrical Protection	actuators are double insulated
Operating Range	DC 210 V, 420 mA w/ ZG-R01 (500 Ω,
	1/4 W resistor)
Input Impedance	100 kΩ for 210 VDC (0.1 mA), 500 $\Omega$ for
Position Feedback	420 mA
	DC 210 V, Max. 0.5 mA 95°, adjustable with mechanical end stop,
Angle of rotation	35° to 95°
Torque motor	[20 Nm]
direction of rotation motor	reversible with CW/CCW mounting
direction of rotation spring-return	reversible with CW/CCW mounting
Position indication	visual indicator, 0° to 95° (0° is full spring
	return position)
Manual override	5 mm hex crank (3/16" Allen), supplied
Running time motor	<75 sec @ 250°F [121°C]
Running time emergency control	<20 sec @ -4122°F [-2050°C], <60 sec
position	@ -22°F [-30°C]
Ambient humidity	5 to 95% RH non-condensing
Ambient temperature	-22122°F [-3050°C]
Non-operating temperature	-40176°F [-4080°C]
Degree of Protection	IP54, NEMA 2, UL Enclosure Type 2
Housing material	zinc coated metal and plastic casing
Agency Listing	cULus listed to UL60730-1A:02; UL 60730-
	2-14:02 and CAN/CSA-E60730-1:02; Listed to UL 2043 - suitable for use in air plenums
	per Section 300.22(c) of the NEC and
	Section 602.2 of the IMC
Noise level, motor	inaudible holding, running <40 dB (A)
	spring <62 dB (A)
Maintenance	maintenance free
Quality Standard	ISO 9001
Weight	4.6 lb [2.1 kg]

† UL File XAPX.E108966

## Torque min. 180 in-lb, Control 2 to 10 VDC, Feedback 2 to 10 VDC

# **Application**

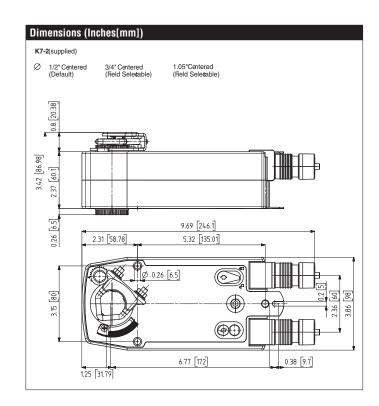

For proportional control of fire and smoke combination and smoke dampers in UL555S applications. In new installations, UL 555S requires that actuators be mounted by the damper manufacturer.

### Operation

The FSAFB24-SR & FSAFB24-SR-S actuators provide 95° of rotation and are provided with a graduated position indicator showing 0° to 95°. A unique manual override allows the setting of any actuator position within its 95° of rotation with no power applied. This mechanism can be released physically by the use of a crank supplied with the actuator. When power is applied the manual override is released and the actuator drives toward the fail-safe position to synchronize before going to the position commanded by the signal.

The actuator uses a brushless DC motor which is controlled by an Application Specific Integrated Circuit (ASIC). The ASIC monitors and controls the brushless DC motor's rotation and provides a Digital Rotation Sensing (DRS) function to prevent damage to the actuator in a stall condition. The position feedback signal is generated by a feedback potentiometer. The actuator may be stalled anywhere in its normal rotation without the need of mechanical end switches. The actuator cannot burn out from being stalled before full rotation is achieved.

The FSAFB24-SR, FSAFB24-SR-S, is mounted directly to control shafts up to 1.05" diameter by means of its universal clamp and anti-rotation bracket. A crank arm and several mounting brackets are available for damper applications where the actuator cannot be direct coupled to the damper shaft. The spring return system provides the specified torque to the application during a power interruption. The FSAFB24-SR, FSAFB24-SR-S, actuator is shipped at +5° (5° from full fail-safe) to provide automatic compression against damper gaskets for tight shut-off.

### Wiring Diagrams

---S2A-F US

# APPLICATION NOTES

Meets cULus requirements without the need of an electrical ground connection.

Auxiliary switch, 2x SPDT, 3A (0.5A inductive) @250 VAC

Provide overload protection and disconnect as required.

Actuators may also be powered by 24 VDC.

Actuators may be powered in parallel. Power consumption must be observed.

500 ohm load resistor for 4-20 mA. Only one resistor for multiple actuators.

Master-slave control/wiring of mechanically paralleled ("piggyback") Fire and Smoke actuators will not function.

Actuators may be electrically paralleled on different damper sections that are not mechanically connected to one another.

Smoke relay and primary heat responsive sensor may be located in hot wire

Only one smoke signal and/or thermal sensor may be employed for all paralleled actuators.

Any wire 5 feedback could be used to indicate position or to drive actuators that are not mechanically paralleled. That is, they are on other dampers.
