

Nailor is First ... Again

Nailor was first to offer Fan Powered VAV Terminal Units that could be flipped over in the field to change from right hand to left hand.

It doesn't matter anymore

Now

Nailor is first to offer Single Duct VAV Terminal Units **WITH ELECTRIC HEAT** that can be flipped to change from right hand to left hand. Units are fully rated to operate in either orientation.

At Nailor, tomorrow's ideas are today's reality.
