

LOUVERS

Model 1606JD

Model 1606JD combines the desired foul weather performance of a drainable louver with the pleasing aesthetics of an architectural louver. High performance J style architectural blades, combined with a drainable head that utilizes a top rain gutter with concealed downspouts in the side frame, prevent cascading water running down the building's face from entering into the airstream during light to moderate rain conditions. The blade design features a rear water baffle, with low pressure drop characteristics and a high free area. Reinforcing bosses run the full length of each blade for superior strength. Suitable for use in ventilation, exhaust and low to medium velocity intake applications where water penetration is a concern. Available in channel, flanged, or glazing adaptor type, the 6" (152) deep frame installs easily in most common wall configurations. Model 1606JD is AMCA Licensed for Water Penetration and Air Performance.

STANDARD CONSTRUCTION:

Frame:	6" (152) deep, Type 6063-T5 extruded aluminum, .080" (2.03) nominal wall thickness. Integral caulking slot provided.
Blades:	Type 6063-T5 extruded aluminum, .080" (2.03) nominal wall thickness, with reinforcing bosses. J style.
Blade Angle:	Fixed at 37 degrees.
Blade Spacing:	Approximately 6" (152) on centers.
Blade Support Brackets:	Concealed type, factory installed on rear of louver on maximum 60" (1524) centers. Reinforced with 1 1/2" x 2" (38 x 51) angle (adds approx. 2" [51] to overall louver depth).
Mullions:	Concealed type allowing continuous line appearance up to 120" (3048) wide. Larger assemblies require separate visible frames with downspouts.
Screen:	3/4" x .051 (19 x 1.3) expanded, flattened aluminum bird screen in removable frame, inside (rear) mount (adds approximately 3/8" [10] to louver depth).
Finish:	Mill.
Minimum Size:	12" W x 12" H (305 x 305).
Maximum Single Section Size:	120" W x 84" H (3048 x 2134) or 84" W x 120" H (2134 x 3048). 70 sq. ft. (6.5 m ²). Larger louvers will require field assembly of smaller sections.

Model 1604KD

Model 1606KD

Model 1604KD

Model 1604KD combines K style blades with a drainable head that utilizes a top rain gutter with concealed downspouts in the side frame, preventing cascading water running down the building's face from entering into the airstream and infiltrating the space. The blade design features a rear water baffle plus an additional center rain hook, providing additional protection against more forbidding weather. Reinforcing bosses run the full length of each blade for superior strength. Suitable for use in ventilation, exhaust and low to medium velocity intake applications where water penetration is a concern. Available in channel, flanged, or glazing adaptor type, the 4" (102) deep frame installs easily in most common wall configurations. Model 1604KD is AMCA Licensed for Water Penetration and Air Performance.
